

SOULBIO ET (Laundry Softener)

● Chemical Composition

Organic fatty acid compound

● Technical Specification

- ☆ Appearance: pale yellow flakes
- ☆ PH value: 3 ~ 5 (5 ~ 10% solution)
- ☆ Ionicity: Weak cationic

● Dissolving Method

- ☆ Cold water: Add the flakes in water (30°C) gradually in the proportion of 5-10%, stir them for 3-5 mins, then leave them aside for 1-2 hours, stir the mixture again gradually to get an even paste.
- ☆ Warm water: Add the flakes in water (room temperature) gradually in the proportion of 5-10%, stir them for 3-5 mins, heat up to 60-70°C and stir them for 30-60 mins again until the flakes become an even paste, then cool it down

● Properties

- ☆ Impart soft, smooth and fluffy handle to fabric
- ☆ Low yellowing
- ☆ Competitive price
- ☆ Hydrophilic

● Field of Application

- ☆ For denim and fabrics washing

● Application

- ☆ Dipping: Dosage: 3 ~ 8% (o.w.f) (10% solution) Temperature: 40 ~ 50°C
 Ratio : 1:10 ~ 15 Time: 30min

● Storage and Packing

Shelf life: 12 months when store in cool, dry and shaded warehouse
Packing: 25kg plastic woven bag

○ Compatibility of other auxiliaries and process need to be checked before application
